## AB BLOOD GROUP AND IDENTITY MARKER REPORT

CARLA SHOWN 8011 NE 329TH ST LA CENTER, WA 98629	<i>Case:</i> <b>CAT18183</b> <i>Date Received:</i> 23-May-2008 <i>Report Date:</i> 05-Jun-2008 <i>Report ID:</i> 0195-6744-2539-7026
<i>Cat:</i> HEARTH&HOME CHEX OF <i>YOB:</i> 07 <i>Breed:</i> BS <i>Sex:</i> F	<i>Reg:</i> CFA2519-1622114 <i>Microchip:</i> Avid 107 343 638
<i>Sire:</i> ELUSIVEBLUE'S DUKE OF CHAUCER <i>Dam:</i> MS LUNA CRIAS	<i>Reg:</i> 2590-1563954 <i>Reg:</i> 2515-1473843

## AB BLOOD GROUP RESULT

b/b

### Result Codes:

- N/N    Cat is Type A or Type "AB"  
N/b    Cat is a carrier of B factor; serotype could be Type A or Type "AB"  
b/b    Cat is Type B

The genetic test for the cat blood group identifies the recessive **b** allele which is associated with the B serotype. Cats with two copies of the **b** allele have the Type B blood group. Cats with one copy of the **b** allele can also be distinguished. These cats can have blood group A or the rare blood group "AB".

Because the genetic test cannot distinguish between a Type A versus a Type "AB" cat, the **non-b** allele is reported as "N". The cat could have a Type A or Type AB serotype.

This test has been validated for domestic cat breeds only. The accuracy of results for wildcat hybrids has not been determined. For further information on the AB blood group test please visit the VGL website at:  
<http://www.vgl.ucdavis.edu/service/cat/bloodgroup.html>.
